iLikeIT2
Learning Through Innovative Collaboration Enhanced by Educational Technology
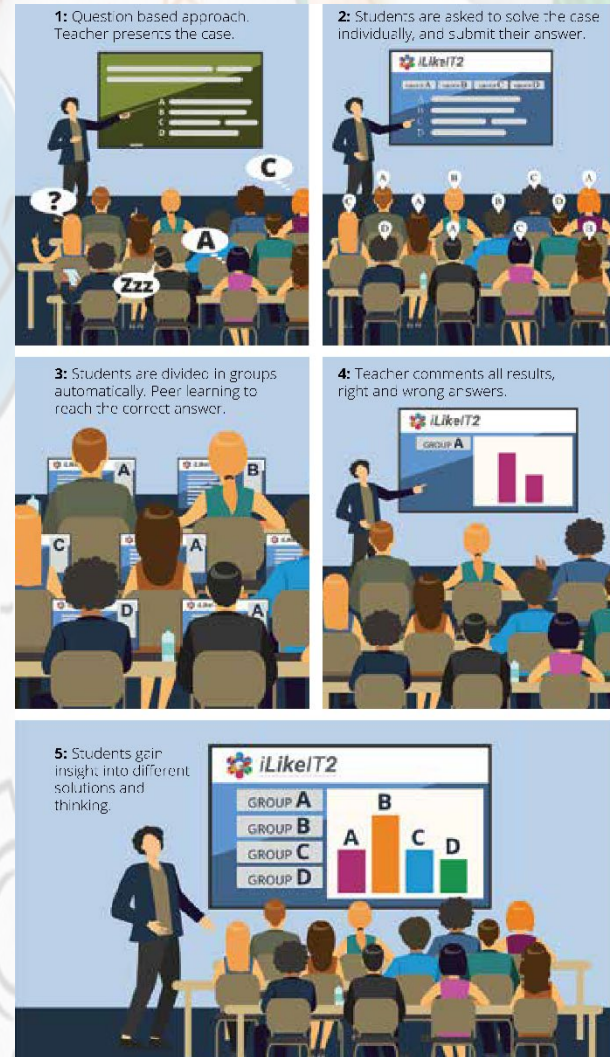

7 STEP METHODOLOGY

1. Conceptualizing the theoretical
framework for the case

2. Distributing materials
for all group members

3. Allowing for individual work
with the case at first

4. Collecting individual answers
if interesting for the case

5. Allowing for collaborative work
on the case provided

6. Collecting collaborative votes
if interesting for the case

7. Summarizing the case and emphasizing
differences in results when collaborating.

Drawing by Marianne Gilbu

The three phases of applying iLikeIT2

Pre-phase: Use one session name for the academic year. Prepare different ways of distributing materials. Decide on the preferred learning environment.

Activity phase: Use chat to communicate. Monitor all groups. Post questions to get attention from all participants.

Post activity: Display all results on projected screen. Use statistics to evaluate your session. Focus on discrepancies internally in each group when addressing results.
